DISTILLERS SYRUP COMMODITY FACTSHEET

Distillers Syrup is a dark brown liquid with a similar consistency to runny honey, having a pleasant fermented odour and slightly bitter taste. The product is the liquid fraction that remains after grains (primarily wheat) have been fermented with yeast and enzymes to produce bioethanol. It is very high in metabolisable energy and a good source of available crude protein due to high carbohydrate and fat contents and low fibre.

Typical Specifications:

DM%	CP%DM	MJ ME/kg DM	NDF % DM	OIL % DM
42	18	15	2.8	9
