(Indicative  
Analysis)

*Energy Booster provides the perfect blend of starches, sugars, fats and digestible fibre. This unique high energy co-product feed is perfect for sheep, dairy cattle, beef cattle and pigs.*

#### High Level of Energy

Energy Booster is a valuable energy source, similar to the levels found in most grains for ruminants.

#### Complements high protein grasses

Energy Booster's highly soluble sugars and fibre break down at the same rate as the soluble protein in pasture grasses, therefore improving utilisation and efficiency.

#### Easy To Use

Energy Booster requires no further processing.

#### Highly Palatable

Cattle, sheep and pigs readily consume Energy Booster due to its high sugar content.

#### High Levels of Starch and Sugar

World renowned ruminant nutritionist Dr Bob Elliott says starch and sugar content in rations are critical for energy to improve rumen microbial development, therefore ensuring better milk protein and high milk volumes in dairy cattle and live weight gain in cattle.

#### Feeding Guide

Due to the high non fibre carbohydrates and low fibre content in Energy Booster, using an adequate effective fibre source is recommended.
